

Risk Management Professional PMI-RMPSM; 30 PDUs, 30 Hours

Course Overview:

Learn advanced project risk management tools and techniques required in preparation for the PMI® Risk Management Professional (PMI-RMPSM) certification.

Learn within your own schedule and at your own pace. For a period of 3 months, you will have full access to the online course lectures (animated presentation slides and audio), risk management practice assignments, on-line true / false quizzes and multiple choice practice tests. Advance your risk management knowledge and skills within such topics as:

- Risk Communication including:
 - Gathering, documenting and reporting on risk information
 - Interpersonal skills for dealing with the sensitive nature of risk
- Risk Analysis including:
 - Risk identification and risk metrics
 - Qualifying, quantifying and analysing risk
- Risk Response Planning including:
 - Risk response techniques and strategies
 - Reserve management practices
- Risk Governance including:
 - Improving risk management effectiveness
 - Monitoring and controlling risky projects

Throughout the duration of the course, an instructor will be available for guidance and to give you feedback on your course work. This course fulfils 30 hours of education in the specialised area of project risk management.

Who should attend:

- Individuals responsible for developing or maintaining project management plans and who want to strengthen their project risk management knowledge.
- Any individual pursuing the PMI® Risk Management Professional certification.

Course Materials:

As part of the registration fee, students will receive a copy of the *Practice Standard for Project Risk Management* issued by the Project Management Institute.
